AMF APPAREL EQUIPMENT DIVISION
GENERAL OPERATING PRECAUTIONS

Equipment described in this manual has been carefully designed and manufactured to our high quality standards. Special attention has been devoted to convenience of operation while simultaneously providing effective hazard protection for operating personnel.

Any piece of machinery can become dangerous to personnel when improperly operated or poorly maintained. Our service personnel are highly skilled and competent in operation and maintenance of our equipment which is installed under their supervision. A major portion of installation supervision time is devoted to instruction and training of your personnel in the operation and maintenance of this equipment. It is incumbent upon you that all personnel who will be expected to operate or maintain this equipment be required to participate in these training and instruction sessions.

Our Service Department is highly skilled in the operation and maintenance of our equipment. It is recommended that you call on their services on a regular and preferably periodic basis to insure proper maintenance of your equipment, and competent training of your personnel.

APPAREL EQUIPMENT

AMF WARRANTY POLICY ON NEW AND RECONDITIONED EQUIPMENT

What is Covered

90 day warranty on both service and parts due to defects in workmanship or materials.

Warranty period shall begin on completed installation date.

One year warranty on parts. Any part customer feels is defective, customer must return, freight prepaid, to AMF Richmond. Upon receiving the part, AMF will inspect and if the part is found to be defective, it will be replaced at no charge to customer.

What is not Covered

Normal adjustments and routine maintenance will not be covered. This is the sole responsibility of the customer.

Cleaning and lubrication of equipment.

Parts found to be altered, broken or damaged due to neglect or improper installation or application.

Shipping or delivery charges.

WHAT TO DO IF THERE IS A QUESTION REGARDING WARRANTY

The satisfaction and goodwill of owners and lessee's of AMF Equipment are of primary concern to AMF Manufacturer's Representatives and AMF Apparel Equipment Division. In the event that a warranty matter is not handled to your satisfaction, the following steps are suggested:

1. Discuss the problem with the nearest AMF Manufacturer's Representative.
2. Contact the customer Service Manager at the address below:

APPAREL EQUIPMENT**MAINTENANCE CHECKS**

CLASS 59 • DIVISION 83

To help insure smooth operation of the AMF Decorative Stitching Machine, the following preventative maintenance should be performed daily, weekly and monthly as indicated:

Daily

1. Clean bottom looper roller, roller must turn freely.
2. Remove any thread and lint from thread drum.

Weekly

1. Clean and oil both needle bars.
2. Check for worn, retaining rings and pins.
3. Make sure needle stops are clean.
4. Make sure needle stop springs are clean and not broken.
5. Reset needle release.
6. Clean top and bottom loopers, check timing.
7. Check belts for proper tension and alignment.
8. Check tension finger timing and clean wax from same. Should be polished or replaced if there is a groove or burr.
9. Oil machine and ~~grease gears.~~

This catalog is issued for Stitching Machines Type 2, 3, & 4, Serial No. 1409 & up.

To locate parts - refer to "MECHANISM INDEX" on Page 5B, 5C, or 5D which lists the page numbers for various units - such as Handwheel and Cam Shaft, Clutch, etc. - where the individual parts are illustrated and listed.

Parts are shown in exploded views in the general sequence of assembly with references to assist in locating views of mating parts.

Part numbers are called out numerically where practicable and will be found on the listing page immediately following the illustration on which they appear.

AMF standard and semi-standard stitch parts, also commercial parts, are listed and illustrated in this catalog.

All commercial hardware is illustrated on the proper page of its use and is called out by a rectangular shaped balloon. Using this item number the part number can be found in the "Commercial Parts List", beginning on Page 2000C.

If any item in this catalog is wanted, it may be ordered by specifying the quantity wanted, the part number, description of part, and the serial number of the machine.

Example: 2 parts, 59-83-1041D, Spring, for Serial No. 1419

To expedite shipments - Parts should be listed in consecutive order.

Example: 2 parts, 59-83-1041D, Spring, for Serial No. 1419
1 part, 59-83-1406A3, Cam, for Serial No. 1419

Disregard moulded number on castings as patterns may be used for other parts.

-Model*- following number indicates part number is incomplete as the parts model due to length of stitch, needle size, etc. Customer should furnish, if possible, the complete number usually stamped on the part being replaced or the incomplete part number, the serial number of the stitching machine and information as requested in notes on pages illustrating the parts.

Individual parts are furnished without screws, nuts, taper pins, cotter pins, dowels, keys, spring post, clamp studs, washers, etc., as these can be transferred in most cases from the part being replaced. Certain parts are furnished without holes, as they must be transferred from parts on the machine.

Parts are shipped F.O.B. our factory. Claims for damage to or loss of express or freight shipments must be filed with local agent. Claims on Insured Parcel Post shipments must be filed through us.

Parts should not be returned without our Return Material Tag. When requesting tags give your order or our invoice number against which parts are shipped. Any material returned without tag will be stored at your risk. All shipments of returned material should be sent to:

Stitches made on the 59-83 STITCHING MACHINE are:

SADDLE STITCH

SHORT - LONG STITCH

ANGLE OR
PICK STITCH

Type 2 Machine (identified by serial number with suffix 12, example #1299-12) is used for Saddle Stitch & Short - Long Stitch.

Type 3 Machine (identified by serial number with suffix 11, example #1224-11) is used for Saddle Stitch, Short-Long Stitch & Angle or Pick Stitch.

Type 4 Machine (identified by serial number with suffix 14, example #1684-14) is used for Saddle Stitch with improved features.

PRESSER FOOT
TYPE 2, 3 & 4
SERIAL NUMBER 1409 & UP

*"M" or MODEL indicates incomplete part number, part varies due to length of stitch & distance from edge of material. When ordering give complete part number stamped on part (Example: 59-83-1047D4-12) or order as 59-83-1047D4 Presser Foot and give stitch length desired and distance from edge of material. Items 4, 5, & 6 comprise Type 2 & 4 Stationary Presser Foot.
